

SAMIYA KHAN

Aspiring AI/ML & Python Developer

■ samiyakhan0282@gmail.com | ■ +91 9644403290 | ■ LinkedIn: [linkedin.com/in/samiya-khan-aa8044434/](https://www.linkedin.com/in/samiya-khan-aa8044434/)

PROFILE

First-year college student with a foundation in Python programming and data manipulation, developed through Class 12 CBSE Informatics Practices. Familiar with NumPy, Pandas, and Matplotlib, with a growing interest in Artificial Intelligence and Machine Learning. Interested in joining the Developers Community to learn from peers, collaborate on projects, and strengthen practical development skills.

TECHNICAL SKILLS

- Programming: Python — Basic to Intermediate
- Libraries & Tools: NumPy — Basics of numerical computing and arrays
- Pandas — Basics of data manipulation and analysis
- Matplotlib — Basics of data visualization
- Python Concepts: Variables, data types and operators; Conditional statements; Loops and iteration; Lists and basic data structures; Functions; Input/output; Basic problem-solving using Python

ACADEMIC EXPERIENCE

Class 12 CBSE — Informatics Practices

- Developed a foundation in Python programming and data handling as part of the CBSE Informatics Practices curriculum.
- Practiced Python programs involving loops, conditions, lists, functions and problem-solving.
- Worked with data using Pandas.
- Used NumPy for basic numerical operations and array manipulation.
- Used Matplotlib to understand and create basic data visualizations.
- Built small Python programs involving calculations, data processing and logical problem-solving.

PYTHON PRACTICE

- Developed programs involving tax and electricity-bill calculations using conditional logic.
- Practiced list manipulation and processing using Python loops and `append()`.
- Worked on programs involving divisibility, prime-number checking and mathematical calculations.
- Practiced solving programming problems by breaking them into smaller logical steps.

AREAS OF INTEREST

Artificial Intelligence • Machine Learning • Python Development • Data Analysis • Data Visualization • Problem Solving

GOAL

I want to build a stronger practical foundation in AI/ML and software development by working on real projects, collaborating with other developers, and learning from experienced members of the community.

EDUCATION

- Class 12 — CBSE
- Stream: Physics, Chemistry & Mathematics (PCM)
- Informatics Practices
- Currently pursuing undergraduate studies

STRENGTHS

- Willingness to learn
- Logical problem-solving
- Interest in technology and AI/ML
- Collaborative mindset
- Consistent interest in improving programming skills
